In Social by Developer Facebook Last Updated: November 10, 2020 Download and install Facebook on PC and install your Facebook 115.0.0.9.100 in your Windows PC and Mac OS. Facebook was developed by Facebook and listed under Social. If you are looking to install Facebook in the PC then read the rest of the article where you will find 2 ways to install Facebook in PC using BlueStacks and Nox app player but you also use one of the following alternatives of BlueStacks. Download and install Facebook on PC (Windows and Mac OS)Below are the 2 methods to install Facebook on PC: Install Facebook on PC with BlueStacks App Player Install Facebook on PC with Nox App Player 1. Install Facebook in PC with BlueStacks BlueStacks is an Android App Player that lets you run Android apps on PC. Below are the steps on installing an app on PC with Bluestacks: To begin, install BlueStacks in PC Launch BlueStacks on PC Once BlueStacks has started, click My apps button in the Search for Emulator: Facebook You'll see search results for Facebook app just install it In logging into your Google account to create apps Download Google Play on Bluestacks After logging in, the installation process will start for Facebook, depending on your Internet connection. Tips: If you have a charging problem with BlueStacks BlueStacks Just install the Microsoft .net Framework software on your PC. Or comment under your problem. Other apps from Facebook developer: Hint: You also download Facebook APK file and install it on Bluestacks Android emulator if you want. You download Facebook APK downloadable file into your PC to install it on your PC Android emulator later. Facebook APK file details: Best Android Emulators Bluestacks & Nox App Player Operating Systems Windows 7.8/10 or Mac App Developer Facebook App Updated November 10, 2020 APK Version 296.0.0.44.119 Category Social Android Version Required for Emulator Android 4.0.3, 4.0.4 APK File Size 51.9 MB File Name com-facebook-katana-296-0-0-44-119_SOFTSTRIBE.apk Download aPP 2. Install Facebook in PC with Nox Follow the steps below: Install nox app player in PC It's Android emulator, after installing run Nox in PC, and logging into Google account Tab searcher and search for: Facebook Install Facebook on your Nox emulator Once installation is complete, you will be able to play Facebook on your PC Facebook for Windows is a social media app that allows you to use a native PC app instead of logging in via a browser. You'll also get desktop notifications for events, even if they're minimized. Share thoughts, customize your news feed, edit privacy and management groups. Desktop Facebook is useful for anyone who likes to be active on this platform. More connected than ever before With the Facebook app downloading for your PC, it's never been easier to keep up with the ever-growing online community. Stay in touch or reconnect with friends and family on any device. This app uses the location, webcam, microphone, photo and video connection of your PC. Once you install Facebook, the software works by accessing your Internet connection and generating dynamic code Installing Facebook on your Windows device is a quick process and the file is about 164MB in size. Once you have the program on your PC, you'll love the usability. Easy to navigate & stay up-to-date The interface is familiar and easy to navigate, and the design is sleek and clean. While there aren't many new features, the software offers seamless browsing and an effortless user experience. There is no great learning curve, even for the most novice user. Once you enter your Facebook sign-in information, you'll see a menu of tabs on the left side of the screen with items like News Feed, groups, and friends. When someone sends you a message, invites you to an event, likes, or comments on your messages, you'll receive a desktop notification. Get the word out let your network in on your daily thoughts or opinions about the world by changing your Facebook status. The box will ask you by asking: What is on your mind? Maybe Not something you want your active grandma to see. Post it anyway! Choose who can see your update by clicking the friends drop-down menu and entering your audience. Some of the most useful Facebook features are the group group Whether you want to plan a holiday party or organize a protest, this is the platform to do it. Use the desktop app to view the groups you're involved in or you're an administrator for. Groups are a great way to communicate with those who share similar interests. Organize your feed To change the way your News Feed appears by going to your News Feed preferences. Change these settings depending on the friends you want to see at the top of your timeline when the images appear, and click the profiles you want to hear more from. The app will recommend video and news clips just for you. Communicate by adding comments, or responding to messages and media by loving, loving, laughing, crying or expressing anger through the emoji button. Share your favorite moments One of the best benefits of the FB app is that users can upload photos and videos in an instant. Never miss the chance to share the most special moments. You also share images on popular social media platforms like Instagram. The software supports a range of video files, such as .avi, MP4 and .mov. Unfortunately, you can't download videos directly from Facebook for Windows. Manage your privacy If you're concerned about privacy, you can change your default settings from the Facebook app. To customize your Privacy Shortcuts, the software redirects you to the browser site. FB contains a huge amount of tools to prevent your data from being mined by third parties. Under the section titled Who Can See My Stuff, you'll change the audience of your future posts and hide what you share from specific people. You also change the settings for your email address, address and phone number so that no one can find your account by searching. Don't forget to limit the visibility of your profile. No games on the PC app Although the PC version of Facebook has a lot to offer, you can't play fun and entertaining games. You will see that there is an option in the menu, but the app will redirect you to the FB website in your internet browser. After that, you have full access to your favorites. Often redirected to the browser A big problem with this app is that it redirects you to a web browser too often. You don't manage chats or make voice and video calls; for that, you would need to download Facebook messenger or use another app like WhatsApp. If you forget your password, you'll be redirected to the site for a two-step verification, where you'll then reset your data. You're still dealing with ads On different platforms, the FB dashboard is full of ads that get in the way of messages from loved ones and old friends. Unfortunately, downloading the software on your PC doesn't get rid of paid suggestions. You're still getting ads based on Facebook's algorithm. Not enough new featuresFacebook for Windows can make the most of what you do on the web or mobile counterparts, but you'll often to a browser. The native software contains nothing new, but the interface is seamless, and it's convenient to have access to this powerful social network across all your devices. In recent updates there has been an increase in speed, and bugs have been fixed regarding the option to load more comments. The app works well on any desktop, and we look forward to the next version, which will hopefully include exciting new features like dark mode. Mode.
